

CAR LEASE CENTRE OF THE YEAR

LeaseTransfer

LeaseTransfer is a classified advertisement platform for private individuals and companies to assign lease transfers. Knowing many lease companies make it very difficult and costly to terminate a lease contract early, LeaseTransfer's aim is to provide a platform that makes the lease and termination of vehicle leases accessible, simple, and reasonably priced, relieving clients of those sometimes cumbersome and inadequate monthly instalments. Leasers can either advertise their vehicle individually or via a professional distribution channel, and with the 100% Accompanied option, LeaseTransfer can even handle the administrative leasing procedures so advertisers can lease their vehicles without any constraints.

The judges praised LeaseTransfer for dramatically simplifying the advertising and leasing process of vehicles, and therefore making leasing more accessible to the Swiss people. LeaseTransfer advertise any make and model of car from the Mini Cooper to the Audi Q8, as long as it meets their standard requirements, meaning the service is suited to all tastes and budgets. They are the first company in Switzerland to offer lease transfers, bringing a new level of security to leasers who can now benefit from an early contract release, save money on unwanted monthly payments, and avoid the threat of prosecution.
